COSMOS

A PROJECT REPORT
Submitted to

Noble University, Junagadh
for the Partial requirement fulfillment
in Bachelor of Computer Applications
Sem - 2

Prepared By:

Ms. Baraiya Aditi [En. No. 230431018]

Mr. Dhanesha Jayvadan [En. No. 230431069]

Mr. Bhatt Nikhar [En. No. 230431028]

Guided By :

Mrs. Pooja Pandya, Assistant Professor

Faculty of Computer Application, Noble University – Junagadh

Certificate

This is to certify that the Project report entitled
COSMOS is a bonafide record of research

Work Done By:

Ms. Baraiya Aditi [En. No.230431018]

Mr. Dhanesha Jayvadan [En. No. 230431069]

Mr. Bhatt Nikhar [En. No. 230431028]

under my supervision and submitted to

Noble University in partial fulfillment for

BACHELOR OF COMPUTER APPLICATIONS (BCA)

SEMESTER 2.

Signature of the Guide:

Designation:

Introduction

- Welcome to COSMOS, your ultimate destination for learning about cosmology and getting needful information about space. Our website is designed for space enthusiast who want to explore the space, universe, our own galaxy, other galaxies and stars.
- Join COSMOS and become a part of a space exploration to get informed about newly performed experiments by NASA, ISRO and other space agencies. With the help of our website, you'll acquire the knowledge about cosmology. Let's work together to get knowledge and job in your dream space agency with the help of our website.

Project Profile:

Project on: – Cosmology

Sem – Year: – B.C.A. Sem 2nd 2023– 2024.

Guidance By: – Prof. Pooja Pandya

Technology: – HTML, CSS & JavaScript

Platform: – Windows

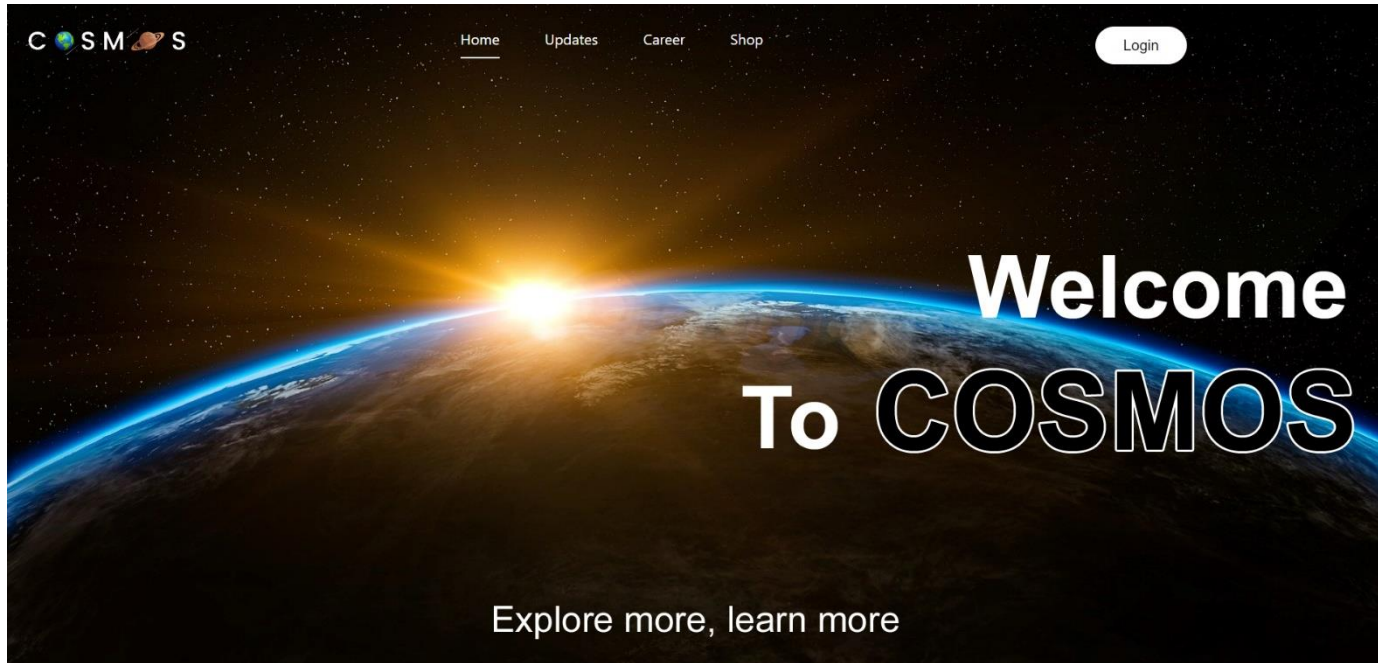

Submitted To: – Noble University, Junagadh

System Snapshots:

- Dashboard Web Page
- Career Web Page
- Exoplanet Web Page
- Hardware Design Web Page

Dashboard Page:

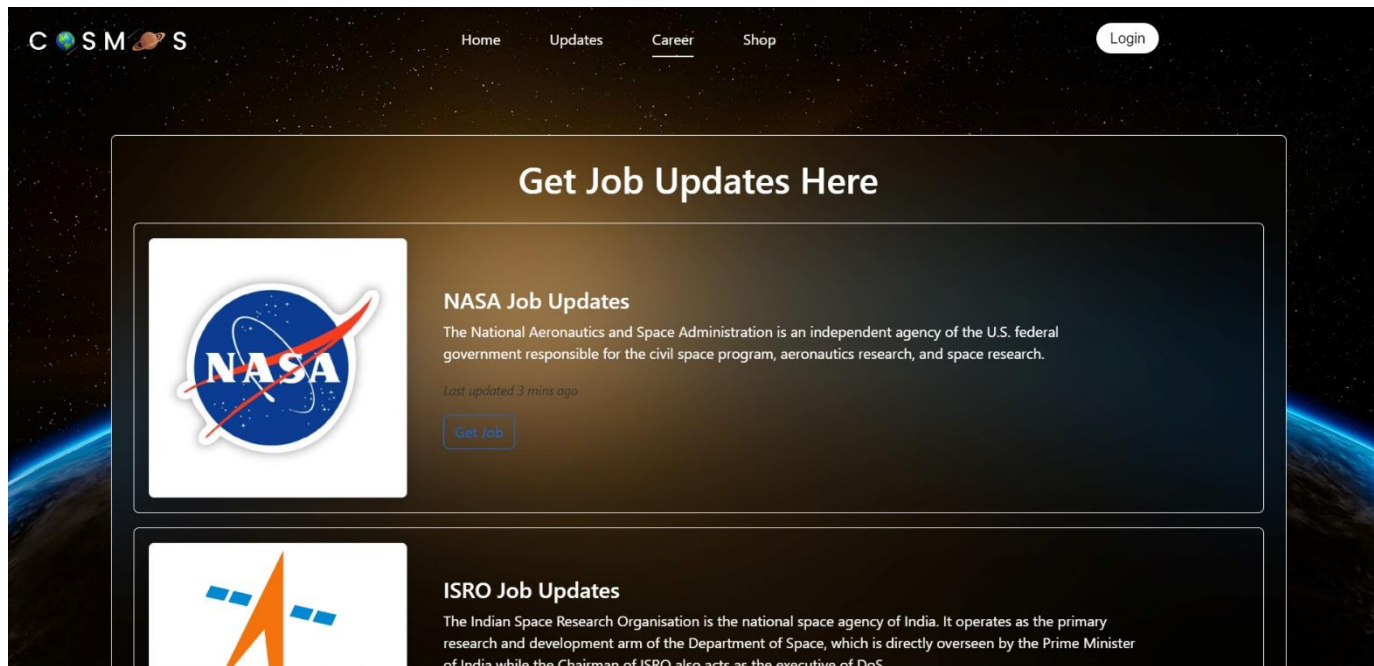

Description:

On dashboard or home screen user will find the logo of website and some navigation hyperlinks like Home, Updates, Career and Shop. User will also find a login button so that he/she could be a part of COSMOS family. If the user is new to website that means first time visitor than he/she has to sign in to create an account so that he/she can access some log in controlled website features like Career. If the user already has an account, then he/she has to share his/her credential details to match with our database and then after only he/she can login.

User will also find a welcome message on Dashboard and a tag line to stay motivated each and every time whenever he/she visits the website.

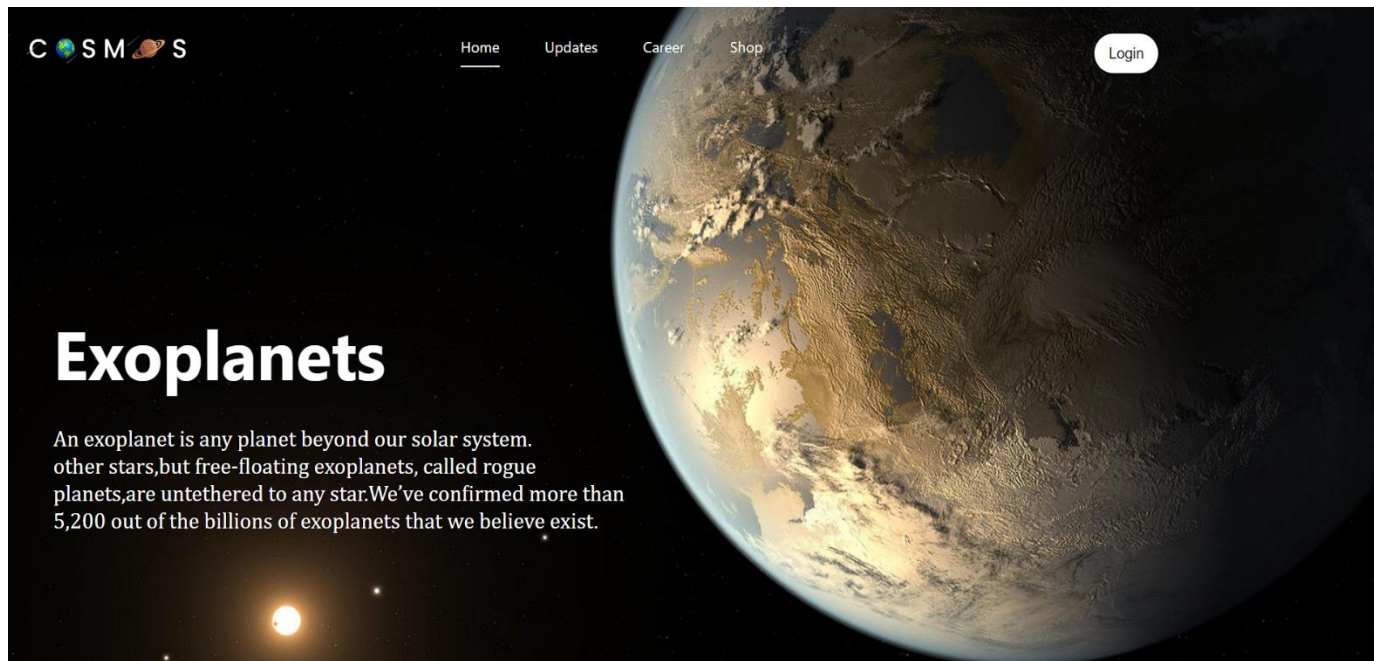

Career Page:

Description:

After logging in or signing in successfully user will get access to this career page. This page is for those users who is interested to serve his/her service in space exploration and in this particular field. Here user will find numbers of space agencies provide job opportunity to people who have required qualifications. Some of those space agencies are NASA, ISRO, SpaceX, etc. These are highly reputed space agencies provide service from numbers of years in this field.

Exoplanets Page :

Description:

User will find a section on dashboard where he/she can get some needful information's about blackhole, planets, galaxies, exoplanets, etc. This section has auto scrolled animation which sides right to left automatically. This section has hyperlink sections in itself which has information user can click on this section and can access the information contained inside the section. Here we are showing you one of those pages which is showing some info about exoplanets. User can use this information in the research, projects or assignments or for its knowledge or personal uses.

Hardware Design Page :

Description:

Hardware design page is a reference page of a rocket designed by SpaceX Space Agency. The rocket is named as Falcon 9. This section basically provides how that specific rocket works? What are the key points of that rocket? How it will perform space mission? Basically, complete information of Falcon 9 and rough idea about every space rockets.

Future Scope of the COSMOS:

- In future we can develop shop page where we can sell COSMOS merchandise to our users by that we can not only earn funds and profits but we can actually be a part of our user's daily routine. Our user (product purchaser) will be our live advertisement, so that our website can reach out to new peoples and they will also be a part of COSMOS Family.
- That was only about shop page and merchandise but we can actually do many more thing in future to scale up our website COSMOS.
- We can develop News & Updates page where we will provide some important information's like upcoming space event, upcoming space missions, achievements, new discoveries, etc.
- We can develop Live Mission page by that we can provide a platform to our users to view live space mission. It could be launching space mission or currently researching and performing tasks space mission direct from other planets and galaxies.

- We can develop Earth and climate page to provide some sensitive information that need to be talked for example we can say global warming, seasonal change, climate change, etc.
- We can develop Science page where we will provide some fun experiments that we can do at our home or in school or college with proper safety guidance.
- We can develop other pages and content as required in future or as demanded by our user. For our user comfort we can add AI assistant in our website to be updated with technology. We can add FAQ page too for our user comfort.

**Thank
You**
